IF YOU'RE READY TO TAKE ON THE WORLD, WE'RE READY FOR YOU.
Armstrong State University is committed to your success. We’ve been helping students start strong since 1935 and continue to provide a network of support to help you reach your full potential. Start your education at a college dedicated to preparing you to take on the world.

START STRONG.
Discover Savannah and Yourself

College life wouldn’t be the same without a proper college town, and what better town than historic Savannah, Georgia? Almost 300 years of living history surrounds you, while shops and Tybee Island beach are all within minutes from campus. Study under a 200-year-old live oak on our 268-acre arboretum campus, go kayaking in the winding marshes, meet friends for a bite downtown, then go out to rescue sea turtle nests — all in the same day.

Strong Stat

Students in art, music and theatre programs participate in more than 100 performances, exhibitions and concerts each year, attracting thousands of visitors to campus. Savannah’s busy festival schedule also draws a crowd, as does its world-renowned St. Patrick’s Day parade. Get your green on with your classmates and make some legendary memories.
YOUR EDUCATION: IT’S EVERYTHING

Armstrong’s professors are mentors who are fully involved in your education and your future. Everything is set for your success: Our degree programs span a broad range of specialties, research opportunities abound, and your professors will introduce you to your field with real-world internships and networking activities. If you ever wanted a team of personal coaches, you’ll have that at Armstrong.

Note: Some programs require secondary admission to the bachelor’s program.
You will begin your studies in an associate-level track.
“The professors at Armstrong are helping prepare me to be the best teacher I can be.”

Victoria loves kids, which is why she decided to major in Early Childhood Education at Armstrong. Over the years, she has worked as a YMCA instructor, a Sunday school teacher, a tutor and a babysitter. As part of her Early Childhood Education degree, she recently completed an internship at Heard Elementary School, where she worked with gifted first-grade students. Victoria says everything she has learned at Armstrong applies in the elementary school classroom, from technology to methodology. When she graduates from Armstrong, she knows she will finish strong and will be ready to hit the ground running in a classroom of her own.
“The coursework, faculty mentors and out-of-the-classroom research opportunities at Armstrong undoubtedly helped me get into medical school.”

When Thomas enrolled at Armstrong, his goal was to become a doctor. This pre-med student recently received an acceptance letter from Mercer University’s prestigious School of Medicine, fulfilling his childhood dream. At Armstrong, Thomas spent plenty of time in the lab conducting cutting-edge research, graduated from the Nick Mamalakis Emerging Leader Program and distinguished himself as an active member of the Biology Club and Pre-Med Club. Recipient of the elite Dorminey Scholarship and the Georgia Recognition Day Award, Thomas credits Armstrong with developing his leadership skills, as well as his science acumen. He’s looking forward to a bright future and the opportunity to help others, thanks to the support he received at Armstrong.
At Armstrong, highly motivated students are challenged with special intellectual, cultural and social opportunities. Among the tools to help you move forward even faster: early registration privileges, scholarships, service programs and positions in leadership. In the end, your academic achievement will be noticed by top companies and graduate programs across the country.

Armstrong’s cutting-edge research facilities and equipment are available to everyone, even freshmen. That’s a rare thing at other universities. What’s more, students and faculty often present their research at national conferences, so you’re actively contributing to the scientific community, while you’re learning and getting valuable hands-on experience.

Your education at Armstrong can broaden your horizons. Spend a semester abroad in one of 55 countries around the world — your experience will be invaluable. Two- and five-week summer study abroad programs are popular options for Armstrong students, and financial aid is available.
Our Latino student success programs have received national recognition.

Not only will you gain knowledge from your professors, you will also learn about the world from your classmates. Armstrong is a thriving mix of ethnicities, cultures and age groups, all sharing their take on life with each other. Our students wouldn’t trade that diverse blend for anything.

Latino students and their families have a strong support system with Armstrong’s Hispanic Outreach and Leadership at Armstrong (HOLA) and Retention (HORA) programs. Special Goizueta Foundation scholarships are also available through Armstrong. Students from every walk of life enjoy events and programs sponsored by the Office of Multicultural Affairs.
“Attending Armstrong has made me more outgoing, organized and hard-working. I’m constantly learning more about myself and how I work best.”

When Erik first visited Armstrong, he knew he found the perfect fit. He loved the tight-knit, comfortable feel of the university and the fact that Armstrong supports promising young Latino students. Erik earned a Goizueta Scholarship, which helped defray the cost of college and enabled him to pursue his dream of owning his own IT company. Today, he has a 4.0 grade-point average and a strong desire to give back to the community. He mentors area high school students through the CAMINO after-school program, which helps Latino students hone their study skills, excel on standardized tests and get accepted to college. Erik loves helping other students achieve their own goals and serves as living proof that success is always within reach at Armstrong.
Windward Commons: Freshman Housing That’s Upper-Class

At Armstrong, freshmen enjoy the newest housing on campus: Windward Commons, a suite-style community where living and learning is like being part of a big family. And whether you score a private or semiprivate room, this is on-campus living at its finest. Trust us, your first apartment out of college won’t be this sweet. Take a look at the floor plans.
STRONG AND SMART – GET MORE EDUCATION THAN YOU BARGAINED FOR

The value of your education is measured by how much you learn, as well as how much it costs. At Armstrong, you get the feel of a private school at a state school price, with tuition that is one of the most affordable in Georgia.

Financial aid comes in many forms: scholarships, student loans, grants, work-study programs, student employment and out-of-state tuition waivers for students who qualify. Complete the Free Application for Federal Student Aid (FAFSA) as early as Jan. 1 at fafsa.ed.gov. Armstrong’s school code is 001546.
A STRONGER WAY TO LIVE WHILE YOU LEARN

Armstrong is more than a campus. It’s a close-knit community of energetic individuals. Want to get involved? How can you not, with nearly 100 clubs and organizations waiting to meet you? Leadership programs, student government, fraternities, sororities and even the Ultimate Frisbee club would love to have you as a member. Armstrong students are also involved in the community, giving back throughout the year. Amidst all this activity is Armstrong’s Student Union, the perfect place to gather, play or just relax.

Twice a year, Treasure Savannah unites more than 500 Armstrong students, faculty and staff to give back to the community, serve meals to the homeless, help local children, beautify the city and make a positive impact.
"It’s hard to find someone on the Armstrong campus — student, faculty or staff — who isn’t willing to help with whatever you need.”

Justin recently made his debut as a conductor, leading the Armstrong Wind Ensemble in a stunning performance. A talented conductor, pianist and French horn player, he is just as passionate about education and helping others succeed.

At Armstrong, he serves as the backstage manager for all music events and has been involved with the University Choir, Wind Ensemble, Jazz Band, Savannah Winds and Armstrong Youth Orchestra. After graduation, this gifted musician and winner of the Armstrong Presser Undergraduate Music Scholar Award plans to start a career as a band director in the local public school system. He’s excited about making sweet music — and inspiring generations of students — for many years to come.
“I like the fact that Armstrong is a close-knit campus. I also like that the coaches, administration and faculty members are dedicated to helping us succeed.”

An accomplished basketball player, Mauri thinks Armstrong is a slam dunk. She is proud to be part of the Pirates’ award-winning women’s basketball team, which played for the regional championship in the Sweet 16 of the NCAA tournament. Her philosophy on the court and in the classroom? Always work hard and give 100 percent. To that end, Mauri is focused on her goal of becoming a physical therapist, working toward a B.S. in Rehabilitation Sciences. She first became interested in physical therapy in high school, when she tore her ACL on two separate occasions. After graduating from Armstrong, she plans to attend graduate school in physical therapy and, ultimately, to help athletes like herself minimize the time spent on the sidelines after injuries. Whether she’s sinking a free throw or acing a class, Mauri knows she’s starting strong at Armstrong.
CHEER FOR THE PIRATES, OR START A TEAM OF YOUR OWN

The Pirates don’t play around. They play for keeps and for titles in the NCAA Division II Peach Belt Conference. Together, the Pirates men’s and women’s tennis teams have won 11 national championships. In 2013-14, Armstrong’s softball, men’s and women’s tennis, volleyball and men’s golf teams advanced to the Sweet 16 or farther in NCAA postseason competition. At Armstrong, there are plenty of opportunities to smear on the face paint and cheer for the home team. Or, if you want to get closer to the game, join one of our many intramural or club sports teams, including rugby, soccer, dodgeball, table tennis and more. You can also break a sweat in our fully equipped recreation center.

PIRATE ATHLETICS

MEN
Basketball • Baseball • Golf • Tennis • Cross Country

WOMEN
Basketball • Softball • Golf • Soccer • Tennis • Volleyball

STRONG STAT

Our student athletes are top performers in the classroom, too. Armstrong has many Academic All Americans, and last year the teams averaged a 3.0 GPA.
INTERNS FROM ARMSTRONG GET MORE THAN COFFEE

They get jobs. Armed with the individual training and guidance from their professors, our students take control of their futures by turning Armstrong’s real-world internships into permanent jobs. Our liberal arts students write articles for local magazines, while economics majors gain experience on a global scale with Savannah’s World Trade Center. Our health professions students serve patients in local health clinics and hospitals, and science students discover opportunities at pharmaceutical and engineering companies. See what others have accomplished at armstrongexperience.com.

A STRONG START AND EVEN BETTER FINISH

Armstrong grads don’t just hang a diploma on their walls and call it a day. In fact, our graduates have become entrepreneurs, leaders in industry, healthcare, government, education and professions of all kinds. They live and lead from Atlanta to Seattle, from Europe to South America. What city or country will you take by storm when you leave our campus?
“I chose Armstrong because it combined all the elements I was looking for in a college: small class sizes and an affordable but excellent education, all in the perfect setting of Savannah, a charming Southern city with rich history and proximity to the beach.”

Michelle loves the fact that she’s not just a number at Armstrong. She is impressed that professors know her by name and are genuinely interested in helping her achieve her goals. Since enrolling at Armstrong, Michelle has landed prestigious internships — and golden networking opportunities — with Mercedes in Berlin and the World Trade Center in Savannah. She’s a member of the International Student Organization and a graduate of the Nick Mamalakis Emerging Leaders Program. Michelle currently serves as a research assistant for Armstrong’s Economic Monitor, gathering important data about the latest economic trends affecting the Savannah area. Her Armstrong experience? Personal, professional and priceless.
